

**NAME: KELVIN CHAN**

**SUBJECT: Reminder Task**

Interface:

Setup the task remind

Task name

Task Description

Date remind

mm / dd / yyyy -- : -- : --

Submit

Task Name	Task Description	Remind date	action
-----------	------------------	-------------	--------

This is my reminder task. Task Name and Task Description we can insert every word for reminder ours. After we can set the date at Date remind to reminder ours.

Setup the task remind

Task name

test

Task Description

test

Date remind

03 / 29 / 2023 12 : 34 AM

Submit

Start, we can setup the task reminds like picture. If click the submit it will show an alert for notify task setup success.

## Show Interface:

	Task Name	Task Description	Remind date	action
Warning your task will appear in 1 day	test	test	2023-03-29 00:34:00	<button>Cancel</button>
Warning your task will appear in 1 day	test2	test2	2023-03-29 00:40:00	<button>Cancel</button>

After setup remind the remind will show at interface like picture, if the date is expired it will show a alert for notify user like "Expired". So, if the task will expire more one day the text will change to color yellow; conversely the task is expired in today will change to color red.

Warning your task will appear in 1 day

Warning your task will appear in 1 day

the task expired date is today

the task expired date is today

## Cancel Button:

	Task Name	Task Description	Remind date	action
Warning your task will appear in 1 day	test	test	2023-03-29 00:34:00	<input type="button" value="Cancel"/>
Warning your task will appear in 1 day	test2	test2	2023-03-29 01:05:00	<input type="button" value="Cancel"/>

Task Name	Task Description	Remind date	action
-----------	------------------	-------------	--------

Finally, I have create a cancel button to cancel the task remind. When I click cancel the task remind will delete from database. When the task remind is delete the interface will also will delete its.
